

## Consensus methods: the past, present, and maybe the future

**Dr. Paul Dijkstra** is a Consultant Sport and Exercise Medicine Physician and Director of Medical Education at Aspetar, Qatar Orthopaedic and Sports Medicine Hospital. He is a DPhil Evidence Based Health Care candidate at the University of Oxford. His thesis aims to inform a more rigorous, inclusive, and evidence-based approach to research on primary cam morphology (including an international consensus on terminology, taxonomy, and definitions).

**Dr. Christian Barton** is an MRFF TRIP Fellow and is the Communications Director at La Trobe's Sport and Exercise Medicine Research Centre. Christian's research interests focus on knee, running injuries and knowledge translation including workforce training and digital technologies to improve access to evidence-based knowledge for health professionals and patients. Christian led the development of the REPORT-PFP, a consensus checklist for the reporting of patellofemoral pain research.

**Paul Blazey** is a UK-trained Physiotherapist now living and working in Canada. He has 13-years of clinical experience and was a co-editor of the textbook Clinical Sports Medicine Ed.5 Vol.2. He is currently a research manager at the University of British Columbia, and has been undertaking post-graduate study in the field of meta-research, primarily focused on consensus methods for research. He is an editor for the Journal of Orthopaedic and Sports Physical Therapy.

**Hosted by:** The OARSI Sport Exercise and Physical Activity (SEPA) Steering Committee

**Date and time:** Dec 9, 2021 21.00 CET / 12.00 PST
